### Message

My Dear Students,

Like every year, this year too IETE would be celebrating Students' Day on 1<sup>st</sup> of February at all its 63 Centres, across the country, in a befitting manner. This day is very special and close to our hearts as on this very special day we celebrate and commemorate our esthetic bond with our students.

This day is exclusively devoted to the Students of IETE and various activities of their interests are arranged like Quiz Contest, Presentation of Technical Papers, Games, Music, Essay Competition etc. This would be an excellent platform for all of you to showcase your innovative ideas, knowledge and skill not only in the Engineering field but also in the cultural and social field. The performances of our students, on this day in the past, were a token of remembrance, a souvenir to cherish our glory.

Although the strength of our students has declined due to withdrawal of recognition of AMIETE by the MHRD, yet, we are representing our case vigorously with the authorities to find out an amicable solution for the recognition of our courses and I am confident very soon we will overcome this quandary.

I wish IETE students' Day a grand success and expect that students at all our Centres would participate with full vigor and zest. The proceedings of the same will be published in the forthcoming issue of IETE newsletter and Journal of Education.

Prof (Dr) K T V Reddy  
President
