

IEEE MTT-S International Microwave and RF Conference (IMaRC) **December 13-15, 2019, IIT Bombay, Mumbai, India**

It is our great pleasure to announce that the seventh edition of the IEEE Microwave Theory and Technique Society's flagship conference in India, IEEE/IETE International Microwave and RF Conference (IMaRC) will be held at the Indian Institute of Technology (IIT), Bombay campus from December 13-15, 2019. This premier conference is held annually in India and provides a forum for the international community of microwave engineers and professionals to present their latest technical achievements and showcase the latest products in the field of microwave, mm-wave and terahertz engineering covering diverse topics such as 5-G technologies, monolithic and hybrid integrated circuits and SoCs, signal generation and modulation circuits and systems, wireless and cellular components, MIMO techniques, radars and SAR, space-based systems and missions, and others.

IMaRC draws an international audience from over fifty countries, expected to have more than 250 presented papers, 400+ delegates, and 1000+ visitors, along with very high-quality technical sessions, panel discussions, tutorials/workshops, and forums for young professionals, women in engineering, and engineering for humanity. Apart from highly stimulating lectures by academic and industry experts (this year's plenary lecture will be given by Nobel Laureate Dr. John Mather of NASA), one of the highlights of IMaRC has been the industry exhibition where companies from all over the world exhibit their newest products.
