About IETE

Founded in 1953, The Institution of Electronics and Telecommunication Engineers (IETE) is a leading professional society devoted to the advancement of Science & Technology in Electronics, Telecommunications, Information Technology, Computer Science and other related disciplines. IETE serves its more than 1.20 lakhs members both individuals and industries/ organizations through its 64 Centres spread all over India including one in Kathmandu (Nepal), Perth and Seattle USA. The Government of India, Ministry of Science and Technology, Department of Science & Industrial Research has recognised IETE as a Scientific and Industrial Research Organisation (SIRO) and the Institution has also been notified as an Educational Institution of National Eminence by the Government of India. The Institution provides leadership in scientific and technical areas of direct importance to the national development and economy. Developing and improving technical and professional competencies, particularly in the working environment, is the greatest challenge that professionals all over the world face today. To help its members, both in India and abroad, avoid technological obsolescence and to achieve the mission of advancing the profession, IETE offers access to latest developments in the technology via conferences, workshops, publications and brain-storming sessions. Mid-Term Symposium, which is one of the flagship events of the institution is one such programme.

About the Conference

The theme of the IETE 57th Mid-Term Symposium & The 8th International Conference on Computational Intelligence and Communication (IC3I 2026) focuses on the theme “**AI for Ubiquitous Connectivity and Sustainable Development.**” The conference aims to bring together researchers, academicians, industry experts, and policymakers to explore the transformative role of Artificial Intelligence in enabling seamless connectivity and addressing global sustainability challenges.

It will serve as a platform for sharing innovative ideas, cutting-edge research, and practical solutions in areas such as smart infrastructure, green technologies, and intelligent communication systems. IC3I 2026 aspires to foster interdisciplinary collaboration and drive impactful advancements for a more connected, inclusive, and sustainable future.
