MESSAGE

Dear Corporate Members, Students and Friends,

It is a matter of immense pride and joy to extend my warmest greetings to all of you on the historic occasion of the 73rd Foundation Day of The Institution of Electronics and Telecommunication Engineers (IETE).

Ever since its inception in 1953, IETE has stood as India's premier professional society dedicated to the advancement of electronics, telecommunication, information technology, and computer science and allied fields. Keeping this in mind, the theme selected for this year's observance is "Silicon Sovereignty: Semiconductor, AI/Revolution & AI Powering the Future of India".

Today, as we commemorate seventy-three years of excellence, innovation, and service to the nation, we look back with deep gratitude at the visionary founding members, past emeritus presidents, GC members and office bearers whose dedication laid the framework for this great institution IETE.

Over the decades, IETE has evolved in tandem with the global technological revolution. From the early eras of broadcasting and analog systems to today's landscape of Artificial Intelligence, 5G/6G communication, Internet of Things (IoT), cybersecurity, network security, blockchain technology, quantum computing and digital transformation are reshaping our world. IETE members and centers/sub-centers have consistently driven these technological progress and academic rigor across the world in particular our own country. Through our technical journals, national and international conferences, skill development initiatives, and strong student forums, our continuous endeavors are successfully bridging the gap between industry requirements and academic excellence.

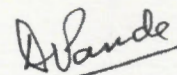

As we celebrate this milestone, our focus remains firmly aligned with the national vision of Atmanirbhar Bharat (Self-Reliant India). The contemporary tech landscape demands that we actively foster indigenous research, champion critical technology architectures, and upskill our engineering youth to turn challenges into sustainable economic solutions. I encourage all our local centers, sub-centers, and student chapters to expand collaborative research networks, organize high - quality technical conferences, workshops seminars and industry interactions that help professionals and students remain future-ready

On this auspicious day, let us renew our commitment to the values of engineering excellence, scientific inquisitiveness and social responsibility.

I express my deepest appreciation to the members of the Governing Council, Center Chairmen, and the entire IETE fraternity for their unwavering commitment to our collective vision. Together, let us continue to innovate, empower, and lead India toward a brighter, technologically sovereign future.

Once again, my heartiest congratulations to IETE fraternity on the occasion of this 73rd Foundation Day. Have a Grand celebration and my best wishes for a memorable event!

Jai Hind
Thank You

(Dr D C Pande)
