## ABOUT IETE

Founded in 1953, The Institution of Electronics and Telecommunication Engineers (IETE) is a leading professional society devoted to the advancement of Science & Technology in Electronics, Telecommunications, Information Technology, Computer Science and other related disciplines. IETE serves its more than 1.20 lakhs members both individuals and industries/organizations through its 63 Centres spread all over India including one in Kathmandu (Nepal). The Government of India, Ministry of Science and Technology, Department of Science & Industrial Research has recognised IETE as a Scientific and Industrial Research Organisation (SIRO) and the Institution has also been notified as an Educational Institution of National Eminence by the Government of India. The Institution provides leadership in scientific and technical areas of direct importance to the national development and economy. Developing and improving technical and professional competencies, particularly in the working environment, is the greatest challenge that professionals all over the world face today. To help its members, both in India and abroad, avoid technological obsolescence and to achieve the mission of advancing the profession, IETE offers access to latest developments in the technology via conferences, workshops, publications and brainstorming sessions. Mid-Term Symposium, which is one of the flagship events of the institution is one such programme.

# ABOUT THE CONFERENCE

**56<sup>th</sup> IETE Mid Term  
Symposium  
and  
International Conference  
on  
Smart Mobility Systems  
(ICSMS 2025)**

Advancements in digital technologies such as IoT, sensors, AI, and electronics & communication are revolutionizing Intelligent Transportation Systems (ITS). The theme of the IETE 56th Mid-Term Symposium & International Conference (ICSMS2025), "Smart Mobility Systems," highlights the latest research, development, and adoption of smart mobility solutions to tackle transportation challenges.

ICSMS2025 is aimed at discussing the technological advancements, research and innovations in Smart Mobility to address critical issues like traffic congestion, environmental impact, road safety, inefficient public transportation, infrastructure capacity pressure, data privacy, cybersecurity, adoption barriers, interoperability, and energy efficiency. It targets to unite academicians, technologists, mobility service providers, city planners, and policymakers to design resilient, user-centric transportation systems. The event will feature keynote addresses, invited talks, tutorials, technical tracks, and presentations by leading experts in smart mobility. IETE's mission is to advance transformative solutions in the mobility sector. The conference also offers a platform for students, innovators, and manufacturers to showcase their projects and innovations.

## **TECHNICAL TRACKS:**

- Smart Mobility for Connected & Autonomous Vehicles
- Smart Vehicles: Electric Vehicles (EV) and Connected, Autonomous Vehicles (CAV) and Urban Air Mobility
- Intelligent Security Systems for Smart Transportation
- SDV, IoT and Edge computing in Smart Mobility Systems
- Human Centric AI in Smart Mobility
- Driving Data Analytics and Crowd-sourced Data

## SPECIAL ISSUES

56<sup>th</sup> IETE Mid Term
